

RADIANT (HYDRONIC) HEATING COMPONENTS >

RADIANT (HYDRONIC) HEATING COMPONENTS

DESCRIPTION:

Radiant in-floor heating is increasingly popular for the dual reasons of unmatched comfort and efficiency.

Our cross-linked polyethylene (PEX) pipe from Rehau, is easy to install in a concrete floor slab in the basement, for slab on grade foundations or within a 2" concrete pour over plywood on additional storeys.

Ideal for the researched do-it-yourselfer, we provide this piping and the necessary manifold at a discount to typical retail pricing.

PRICE:

Quoted item

ORDER & DELIVERY:

- Minimum Orders: 500' length, 100' increments
- Delivery Time: 1-4 weeks

ADDITIONAL INFO:

With the plans for your building together with notations regarding insulation levels, window types and sizes, and geographic location, we can determine your heat loss, generate a map of the ideal layout of the hydronic pipes and supply the piping and manifold to permit direct connection to your plumbing system.
