

WINDOWS AND DOORS - FIBREGLASS FRAMED >

WINDOWS AND DOORS - FIBREGLASS FRAMED

DESCRIPTION:

Fiberglass framed and wood over fiberglass framed windows, garden doors, patio doors and entry doors always with low E2 finished, argon filled double pane glass for maximum efficiency and elegance.

Fiberglass frames have unmatched thermal expansion stability which provides for a life expectancy several times that of Vinyl (polyvinylchloride or PVC) framed windows.

The benefits include:

- Salt and moisture resistant
- Chemically inert
- Low in maintenance and higher in insulating value
- Better life-cycle cost than vinyl clad windows.
- Suitable for retrofit or new construction

We can have most styles custom made to your exact dimension requirements and all are available with additional aesthetic features such as grilles and brick moulds.

PRICE:

- Quoted item
- Quantities, dimensions, colours, styles, direction of opening and options required to provide pricing

ORDER & DELIVERY:
